

TowerRAID TR4M6G

4-Bay eSATA 6G Port Multiplier RAID 0/1/10/5/JBOD Tower w/ 6G PCIe Card

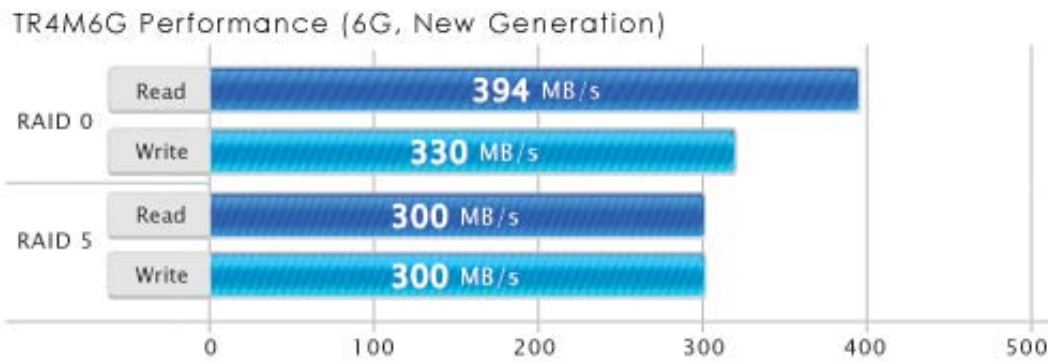

The **TowerRAID TR4M6G** is the world first 6G port multiplier storage, bundled with 6G PCIe 2.0 x4 RAID 5 controller. It is a compact RAID tower utilizing the latest SATA III port multiplier technology, where one single eSATA cable connects to four 6Gb/s SATA hard drives. Bundled with a high performance RAID controller card RR642, its RAID 5 performance is capable of reaching over 300MB/s. Online expansion is a feature included in the controller card so that RAID could be expanded without the need to recreate the storage space or erase the existing data. Advanced monitoring functions include real time hard drives health status, remote RAID management and e-mail notification for critical events. Designed with easy installation in mind, the trayless TR4M6G allows instant setup by simply inserting the hard drives after opening the protective ventilating cover. The included dual-port eSATA 6Gb/s PCIe 2.0 x4 RAID controller card allows the connection of up to two TR4M6G units (up to 8 hard drives) using only two cables, while all drives could be configured into a single or multiple RAID arrays, providing over 700MB/s in performance with 8 drives.

Features

- New 6G Port Multiplier PM storage, with 6G RAID controller, fully support 6G hard drives.
- Bundled with RR642 RAID controller card, PCIe 2.0 x4, for over 300MB/s RAID 5 performance.

- Dual-port eSATA 6Gb/s PCIe 2.0 x4 RAID controller supports up to 2 units or 8 hard drives in a single or multiple RAID array.
- Backward compatible with PCIe 1.0.
- Supports RAID 0, 1, 10, 5, 5+ spare, spanning and JBOD.
- Supports online expansion to expand capacity without the need to recreate the RAID volume and erase the existing data.
- Built-in real time hard drive health monitoring, remote RAID management and e-mail notification for critical events.
- Supports PC, Linux and MAC OS, including Windows 8, Windows Server 2012 and MAC OS 10.6 or up.
- Accesses four hard drives using only one cable.
- Host interface: eSATA with 6G Port Multiplier.
- Drive interface: 4 x 3.5" SATA, up to 4TB per drives.

Model	TR4M6G
Form Factor	Compact Tower
HDD Bays	4 Hot-Swappable 3.5"
RAID Level	RAID 0, 1, 10, 5, 5+spare, Spanning and JBOD (via Bundled RR642 RAID Controller Card)
Maximum Capacity	16TB Raw
Host Interface	eSATA (via 6G Port Multiplier) PCIe 2.0 x4 for RR642 RAID Controller
Drive Interface	4 x 3.5" SATA
Cooling Fan	3.15" Ball Bearing Fan
Power Supply	150W (115V - 230V Switchable)
Status Indicators	Power LED and 4 * Access LEDs
Dimension (in)	5.3"W x 7.1"H x 10.0"D
Weight (lb)	5.9 lb
Safety Regulations	CE, FCC, UL, RoHS
Limited Warranty	2 Years
