

# SANS DIGITAL TowerRAID TR8U+B

8 Bay SATA to USB 3.0 JBOD Enclosure (Black)

## Overview

The **TowerRAID TR8U+B** is an 8-bay storage enclosure for high capacity storage needs. With a built-in ventilating protective screen front panel, both units utilize a cable-less backplane-design to support up to eight hard drives. Connecting to the USB 3.0 slot for 5Gb/s performance, 8 hard drives can be accessed at the same time using a single USB 3.0 cable. Backwards compatible with USB 2.0, the TR8U+B provides expandable storage with ease. Hard drives are installed on easy access hard drive trays for simple insertion and removal. With support of the latest 4TB hard drives, the TR8U+B is capable of having a total of 32TB in a single tower. Hard drive cooling is provided by a large 4.7" cooling fan located on the back of the unit. Supported in PC, MAC and Linux, the TR8U+B is an ideal solution for your storage needs.

## Features

- Supports eight 3.5-inch SATA hard drives to USB 3.0 interface, using a single USB 3.0 cable.
- Access 8 hard drives individually.
- 8 \* Removable Hard drive trays for easy installation.
- Compact and stylish 8-bay tower design with protective ventilating cover.

## Specifications
